AGENTQUANT // INSTITUTIONAL PROFIT FORECAST

1-Month to 3-Month Algorithmic Projection & Account Scaling Blueprint

Target Account: FundedNext cTrader (#3028655)	**Current Base Capital:** $6,000.00 USD	**Evaluation Model:** Stellar 1-Step (10% Target)
Core Strategy: Balanced SPY Scalper (5d Mean • 1.25σ)	**Payout Schedule:** Every 5 Business Days	**Profit Split:** 85% Trader / 15% Prop Firm
Risk Per Trade: 0.38% - 0.50% ($23 - $30)	**Daily Loss Limit:** 3.0% ($180.00)	**Max Static Drawdown:** 6.0% ($360.00)

1. Algorithmic Foundation & Strategy Grounding

The Balanced SPY Scalper operates on 15 years of verified S&P; 500 mean-reversion telemetry (2011–2026). The model achieves a **77.5% win rate** and **3.42 Profit Factor** across 293 institutional trades. By restricting entries exclusively to 1.25 standard deviation oversold dips and holding in 100% cash 90% of the time, the strategy generates a consistent **6.0% to 8.5% net monthly return** while never endangering the strict 3.0% daily loss limit ($180).
