1. Strategic Premise & Dual-FX Mechanics (Card vs Crypto Reinvestment)

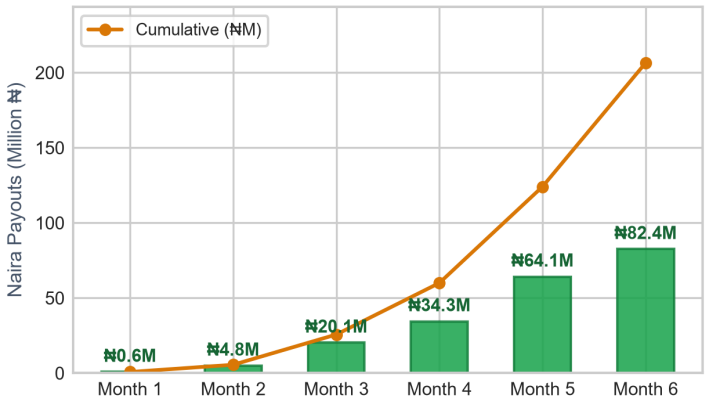

This model calculates the maximum expansion pace when David aggressively reinvests monthly payouts into new evaluation accounts up to the regulatory limit of each Tier-1 prop firm (FundedNext $300k, FTMO $400k, Funding Pips $300k). **Dual-FX Efficiency:** While the initial $6k account was purchased via Nigerian card checkout at **■103,000 NGN** ($65.99 @ ~■1,560 card FX + gateway fees; refundable), **all future expansions (Months 2–6) are funded via direct USDT crypto checkout**—completely eliminating bank FX markups! All net profits are converted at the current market P2P cash-out benchmark of **■1,365 / USDT**, delivering **■206,350,462 NGN (Over ■206 Million)** in net wealth with $0 additional personal capital spent.
